

# 24" 815X610X750X35X2

**Nominal Pipe Size:** 24 inches

**Inside Diameter (I.D.):** 24 inches

**Outside Diameter (O.D.):** 32 inches

**Standard Thicknesses:** 1/16 inch (1.6 mm) and 1/8 inch (3.2 mm); other thicknesses available by special order.

**Material Options:**

- **Cloth Inserted Rubber:** Suitable for applications requiring mechanical fastening or heavy flange loading to reduce gasket creep.
- **Compressed Non-Asbestos Fiber (CNAF):** An alternative to asbestos gaskets, offering good heat resistance and suitable for various industrial applications.

**Design Standard:** ANSI B16.21

**Flange Design Standard:** ANSI B16.1/B16.5, BS 1560

**Flange Face:** Flat Face (FF)

**Pressure Class:** 150 lb

**Applications:**

- Main steam flanges
- Potable water pumps
- Sludge, slurry, and sewage pumps
- Connecting ANSI standard flange pipes
- Recycling water from mining, petrochemicals, power plants, consumer waste
