

Product Name: A-21237 MANIFOLD, 2 PUMP, ARV

Brand: Ariel

Description:

The A-21237 manifold is designed for use in high-pressure lubrication systems. It efficiently distributes lubricant to multiple pumps, ensuring reliable performance and durability in industrial applications.

Specifications:

- **Material:** High-grade, impact-resistant materials
- **Pressure Rating:** Suitable for high-pressure applications
- **Connections:** Designed for compatibility with Ariel's force-feed lubrication systems
- **Color:** Typically green or blue, depending on the specific model
- **Features:**
 - Auto-resetting relief valve to prevent overpressure
 - Efficient lubricant distribution to multiple pumps
 - Durable construction for long-term use

Applications:

Used in various industrial settings where reliable lubrication of multiple pumps is required, such as in compressors and other heavy machinery.

Maintenance:

Regular inspection and maintenance are recommended to ensure optimal performance. Follow the manufacturer's guidelines for servicing and part replacement.
