

301560

COMET 5000 High Pressure Regulators are ideally suited for industrial or laboratory work, pneumatic loading of test apparatus, static testing of pressure components, pressurising high pressure systems or high pressure decanting.

Based on the COMET regulator design. Provides safe and accurate control of pressures up to 3,000kPa

Pressure relief valves for the 3,000kPa delivery regulators.

Special hardened diaphragms for strength and accuracy.

Tube outlet connectors prevent accidental connection to low pressure equipment.

Gauges comply to AS1349. Inlet connections comply to AS2473.

Blowpipe

COMET 3

Extension Barrel

307123, 307124, 307125

Gas Consumption (Fuel)

41-55 l/min

Gas Consumption (Oxy)

45-58 l/min

Heat Output

180 MJ/HR

Mixer

304003

Model Number

SHA1

Operating Pressure (Fuel)

100 kPa

Operating Pressure (Oxy)

150 kPa

Tip Size

8x12
